MapInfo Training
Course Outline: Intermediate

Course requirements

To gain the most from this course, participants should have completed the MapInfo Basic 2 day course and had the opportunity to put those skills into practice outside of the training environment. Alternatively, equivalent skills gained through informal training and experience may be adequate. Please contact our training manager if you are unsure which course is best for you.

Course objectives

The objective of this course is to build upon participants existing knowledge of MapInfo and so show how MapInfo can be used to exploit data in a range of differing formats.

Day 1

- Modifying the table structure
- Complex graphic objects
- Complex SQL
- Complex thematic mapping
- HotLinks
- Correcting problems in workspaces
- Creating simple macro
  - Building the macro
  - Saving the macro
- Working with data from other applications (Data import)
- Updating columns
- Creating buffers
- Data validation
- Splitting, update column and SQL
